

# HybridPACK™ Drive Module

FS380R12A6T4B

Final Data Sheet

V3.1, 2019-09-10

Automotive High Power

### 1 Features / Description

HybridPACK™ Drive module with Trench/Fieldstop IGBT4 and Emitter Controlled 4 diode

$$V_{CES} = 1200 \text{ V}$$

$$I_C = 380 \text{ A}$$

#### Typical Applications

- Automotive Applications
- Hybrid Electrical Vehicles (H)EV
- Motor Drives
- Commercial Agriculture Vehicles

#### Electrical Features

- Blocking voltage 1200V
- Low  $V_{CEsat}$
- Low Switching Losses
- Low  $Q_g$  and  $Cr_{ss}$
- Low Inductive Design
- $T_{vj op} = 150^\circ\text{C}$

#### Mechanical Features

- 4.2kV DC 1sec Insulation
- High Creepage and Clearance Distances
- High Power Density
- High Performance Si<sub>3</sub>N<sub>4</sub> Ceramic
- Direct Cooled PinFin Base Plate
- Guiding elements for PCB and cooler assembly
- Integrated NTC temperature sensor
- PressFIT Contact Technology
- RoHS compliant
- UL 94 V0 module frame

#### Description

The HybridPACK™ Drive is a very compact six-pack module (1200V/380A) optimized for hybrid and electric vehicles. The power module implements the IGBT4 generation. The chipset has high short circuit ruggedness and come with a matching efficient and soft switching Emcon4 diode.

The new HybridPACK™ Drive power module family comes with mechanical guiding elements supporting easy assembly processes for customers. Furthermore, the press-fit pins for the signal terminals avoid additional time consuming selective solder processes, which provides cost savings on system level and increases system reliability. The direct cooled baseplate with PinFin structure and optimized ceramic material in the FS380R12A6T4B product best utilizes the implemented chipset and shows superior thermal characteristics. Due to the high clearance & creepage distances, the module well suited for increased system working voltages and supports modular inverter approaches.

Specification according to the valid application note.

<sup>1)</sup> For applications with applied blocking voltage > 60% of the specified maximum collector-emitter voltage, we recommend to evaluate the impact of the cosmic radiation effect in early design phase. For assessment please contact local Infineon sales office.

<sup>2)</sup> Verified by characterization / design not by test.

<sup>3)</sup> Cooler design and flow direction according to application note AN-HPDPERF-ASSEMBLY. Cooling fluid 50% water / 50% ethylenglycol.

### Legal Disclaimer

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics. With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation, warranties of non-infringement of intellectual property rights of any third party.

### Information

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office (<http://www.infineon.com>)

### Warnings

Due to technical requirements, components may contain dangerous substances. For information on the types in question, please contact the nearest Infineon Technologies Office.

These components are not designed for "special applications" that demand extremely high reliability or safety such as aerospace, defense or life support devices or systems (Class III medical devices). If you intend to use the components in any of these special applications, please contact your local representative at International Rectifier HiRel Products, Inc. or the Infineon support (<https://www.infineon.com/support>) to review product requirements and reliability testing.

Infineon Technologies components may be used in special applications only with the express written approval of Infineon Technologies. Class III medical devices are intended to be implanted in the human body or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
